

The image shows a screenshot of the Python IDLE Shell 3.11.0 application window. The window has a standard macOS-style title bar with a red close button, a yellow maximize button, and a green window button. Below the title bar is a menu bar with the following items: File, Edit, Shell, Debug, Options, Window, and Help. The main area of the window is a text editor with a light gray background. It contains the following text:

```
Python 3.11.0 (main, Oct 24 2022, 18:26:48) [MSC v.1933 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license()" for more information.
>>> "hello world"
"hello world"
>>> |
```

The text is color-coded: the prompt characters '>>>' are blue, the string literals '"hello world"' are green, and the cursor '|' is blue. The window also features a vertical scrollbar on the right side.
